

VEROT focuses on the Management System as a way of organizing business life, basing it on basic pillars such as the quality of our products and processes, continuous improvement, the satisfaction of all interested parties and proactivity in caring for the environment that surrounds us.

Since its origin, VEROT has had the philosophy of offering its clients the best and broadest service possible. This philosophy is materialized through our Industrial Policy, which is based on the following points:

- Obtaining the best technology available in the Machine Tool Market, which allows us to offer a wide range of Services to our Clients.
- High professional qualification of our employees, in order to obtain optimal performance from both the people and the available means of production.
- The optimization of our industrial processes in order to give our clients the shortest possible delivery times.
- Comply with all applicable requirements and regulations, as well as any other requirement that the organization itself decides to subscribe to or is established with the organization's interest groups.
- Prevent pollution, optimize the use of natural resources, minimize our generation of waste, emissions and discharges, and provide training and means to our employees to actively collaborate in this cause.
- Continuously improve our energy efficiency, as well as energy use and energy consumption, with a systematic approach.
- Make the most of the advantages provided by renewable energies to improve the efficiency of our resources and try to reduce the consumption of other energy sources such as fossil fuels.
- Quality is part of the work carried out daily by any operator, internal or external.
- Raise awareness and provide information to external suppliers so that they actively collaborate in caring for and respecting the environment and in any quality requirement of the organization or application standards such as UNE-EN ISO 9001, UNE-EN ISO 14001, UNE -EN 1090-1 and 2, UNE-EN ISO 3834-2 and UNE-EN 15085.

For the active application of these principles, the support of both Management and the entire VEROT staff, as well as suppliers and customers, is absolutely necessary.
